## Biosphere & Climate Dynamics Modelling

### Summary

e: douglas.i.kelley@gmail.com

w: douglask3.github.io

m: +44 (0) 7936 726 819

#### Academic qualification

##### PhD Ecology

2014

Macquarie University, Department of Biological Sciences, Ryde, NSW, Australia

Thesis: Modelling Australian fire regimes

##### MSc Earth System Science

2008

University of Bristol, Department of Earth Sciences, UK

Dissertation: Statistical modelling of global fire regimes.

#### Recent Employment History

##### Postdoctoral Research Assistant

Apr 2015-present

Department of Geography & Environmental Science, University of Reading, UK

##### Postdoctoral Research Assistant

Jun 2014-Mar 2015

Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

#### Publication Statistics

Total Citations: 195    H index: 6    i10 index: 4

#### Examples of Awards won

##### Macquarie University Research Excellence Scholarship

2010-2014

Macquarie University, Ryde, NSW, Australia

##### Post Graduate Research Fund (PGRF)

2013

Macquarie University, Ryde, NSW, Australia

#### Current Research Interests

Vegetation-climate dynamics and ecosystem modelling, including:

- Fire dynamics and fire-climate-vegetation interactions
- Wildfire impacts (on e.g vegetation, carbon-cycle, hydrology)
- Vegetation disturbance resistance/protection and recovery
- Vegetation model benchmarking and diagnosis
- Plant resource allocation strategies

#### Skills

##### Programming

- Fortran
- C++
- C
- R
- Python
- Matlab
- Shell

See examples at [github.com/douglask3](https://github.com/douglask3) and [bitbucket.org/douglask3](https://bitbucket.org/douglask3)

##### Web Design & Publishing

- html
- CSS
- PHP
- Markdown
- Python/R for webpage generation
- Wordpress
- Concrete5
- Latex
- Illustrator
- Photoshop
- GIMP
- Scribus
- plus standard office

See examples at [douglask3.github.io/pages/websites](https://douglask3.github.io/pages/websites)

##### Software Tool development

See examples at [douglask3.github.io/pages/tools](https://douglask3.github.io/pages/tools)

## Biosphere & Climate Dynamics Modelling

### Extended CV

#### Contact Information

- **Name** : Douglas I Kelley
- **Date of Birth** : 06/08/1984
- **Nationality** : British
- **Work Address** :  
Department of Geography & Environmental Science  
University of Reading  
Whiteknights  
Reading  
RG6 6AB  
UK
- **Home Address** :  
Flat 40  
18 Oxford Road  
Reading  
Berkshire  
RG1 7LB  
UK
- **Email** : [douglas.i.kelley@gmail.com](mailto:douglas.i.kelley@gmail.com)
- **Web** : [douglask3.github.io](https://douglask3.github.io)
- **Phone** : +44 (0) 7936 726 819

#### Academic qualification

##### PhD Ecology Modelling Australian fire regimes

2010-2014

Macquarie University, Department of Biological Sciences, Ryde, NSW, Australia  
Benchmarking and developing the LPX Dynamic Global Vegetation Model (DGVM) to improve the simulation of fire and fire-vegetation interaction. Using this new version of LPX to simulate fire, vegetation and carbon dynamics in Australia over the 21<sup>st</sup> century. Thesis can be downloaded from [www.goo.gl/9YjwKw](http://www.goo.gl/9YjwKw)

##### MSc Earth System Science

**Main dissertation:** Wildfires as part of the global carbon cycle - quantitative analysis using data assimilation

2007-2008

University of Bristol, Department of Earth Sciences, UK  
Other subjects covered: Earth system modelling; Natural hazards; Remote sensing & GIS; Isotopes and other Earth System tracers; Climate change science and policy

##### BSc (Hons.) Physics

**Main dissertation:** Modelling atmospheric effects on starlight

2002-2007

University of Warwick, Department of Physics, UK

#### Employment History

##### Postdoctoral Research Assistant

Apr 2015-present

**Department of Geography & Environmental Science, University of Reading, UK**

Simulating present and future fire regimes using a coupled dynamic global vegetation model (DGVM) and process based fire model.

##### Postdoctoral Research Assistant

Oct 2014-Apr 2015

**Cafe M Research Group, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia**

Testing conceptual phenology and plant carbon allocation models under changing climate and fertilization from elevated CO<sub>2</sub>.

##### Research Assistant

Jun 2014-Sep 2014

**Biosphere & Climate Dynamics, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia**

Modelling changes in past and future vegetation-fire dynamics and its feedback on terrestrial and atmospheric carbon.

## Research Assistant

Sep 2008-Sep 2010

**Department of Geographical Sciences, University of Bristol, UK**

Developing a coupled DGVM-fire model and applying the model to: test the effectiveness of different fire management techniques in current and future climates; and simulate paleo vegetation and carbon stocks.

douglas.i.kelley@gmail.com

Made using r2cv R package - [github.com/douglask3/r-cv](https://github.com/douglask3/r-cv)

# Extended CV

## Employment History Continued

### Earth System Science Summer School coordinator

Apr 2008-Sep 2008

**Department of Earth Sciences, University of Bristol, UK**

Publicity; lecture and seminar timetabling; finding and organising guest lectures; general admin.

### Widening Participation

Sep 2007-Sep 2008

**Widening Participation Office, University of Bristol, UK**

Working with students in primary and secondary education to encourage university attendance from low socio-economic backgrounds: helping organise & run University open days and campus tours; school presentations and career evenings.

## Publication

- Total Citations: 195    H index: 6    i10 index: 4

## Award

### Macquarie University Research Excellence Scholarship (iMQRES)

2010-2014

Macquarie University, Ryde, NSW, Australia

Postgraduate award for completion of PhD

### Postgraduate Graduate Research Fund (PGRF)

2013

Macquarie University, Ryde, NSW, Australia

Competitive award to enhance postgraduate research experience. Funded attendance at the 2013 AGU fall conference in order to present DGVM development and future projection of fire regimes and terrestrial carbon stocks under climate change

## Extended CV

## Award Continued

### Biology postgraduate conference best presentation

2011

Biological Sciences, Macquarie University, Ryde, NSW, Australia

Best presentation out of the departments 78 postgraduate students at the annual post-graduate conference. Awarded for presentation on a vegetation model benchmarking system

## Current Research Interests

My research focuses on improving our understanding of the interactions between vegetation and climate, and exploring how these interactions impact terrestrial ecosystem properties such as composition, disturbance regimes, and carbon and hydrological cycles. Much of this involves utilising experimental and satellite data for more observation-driven vegetation model development and benchmarking. Most of this has been exploring climate and vegetative controls and fire, and the impact fire has on ecosystem, atmospheric emission and the carbon cycle, and vegetation-controlled hydrology. I am also involved in projects that explore plant resource allocation, phenology and drought recovery strategies.

My current research projects include:

### Development of the LPX coupled Dynamic Vegetation-fire model

[douglask3.github.io/lpx-dynamic-global-vegetation-model](https://douglask3.github.io/lpx-dynamic-global-vegetation-model)

Much of my thesis focussed on the assessment and development of the LPX-DGVM-fire model to better represent fire and fire-adapted vegetation in tropical savanna ecosystems. Continued development strands include :

- Improving fire-model performance for forest ecosystems
- Parameterization of the carbon cycle and trace gas emissions
- Continued development of disturbance resilience and resistance traits - e.g. resprouting after fire and drought.

### Vegetation model benchmarking and inter-comparison

[douglask3.github.io/vegetation-model-inter-comparison-benchmarking](https://douglask3.github.io/vegetation-model-inter-comparison-benchmarking)

I am the main developer and maintainer of the most widely used vegetation-model benchmarking system, which qualitatively assess model performance for a variety of vegetation and land surface processes. Current work includes:

- Incorporation for fire regime observations
- Inter-model comparisons for the fireMIP project
- R software package development

### Vegetation disturbance resistance and recovery databases

[douglask3.github.io/traits-for-resistance-and-recovery-to-disturbance](https://douglask3.github.io/traits-for-resistance-and-recovery-to-disturbance)

I have been one of the lead collaborators on compiling several databases describing site based

disturbance resistance and recovery traits across plant species, disturbance regimes and climate gradients. These include:

- Bark Thickness as protection against fire.
- Resprouting as a recovery to extreme fire and drought disturbance.
- Post-fire re-seeding strategies.

### Plant resource allocation strategies

More recently, I have become involved in research projects exploring wider vegetation dynamics and responses to environmental change including:

- The testing of conceptual carbon allocation strategies in a vegetation model framework, and the response of these strategies to changing climate and increasing CO<sub>2</sub> fertilization.
- Development of a simple dry-season phenology model for tropical grass and woodland ecosystems.

For more detail on all these projects, see [dougask3.github.io/pages/research-interests](http://dougask3.github.io/pages/research-interests)

### Workshops and Consultancy Visits

### Using plant functional traits to predict ecosystem vulnerability to changing fire regimes

**Australian Centre for Ecological Analysis and Synthesis (ACEAS)**

*Oct 2013*

University of Queensland, Brisbane, QL, Australia

Data Synthesis workshop for fire resilience and response analysis

Douglas Kelley - CV

page 5 / 8

[douglas.i.kelley@gmail.com](mailto:douglas.i.kelley@gmail.com)

Made using [r2cv.R package - github.com/dougask3/r-cv](https://github.com/dougask3/r-cv)

## Extended CV

### Workshops and Consultancy Visits Continued

### Fire response traits database

*May 2013*

Macquarie University, Ryde, Australia

Workshop on construction of a database describing distribution of different resprouting traits in climate space, as part of the Australian Centre for Ecological Analysis and Synthesis (ACEAS) Working group "Using plant functional traits to predict ecosystem vulnerability to changing fire regimes"

### Technical Assistance for Climate Change

*Oct 2009*

Royal Society for the Conservation of Nature, Jordan

Report on Impacts of Future Climate Change on Vegetation, Fire, and Runoff in Jordan

### Training Courses

### An Introduction to Research Impact

*Jun 2016*

**University of Reading, UK**

Understanding & identifying potential impact of research including economic, social and policy, and how to write impact summaries and "pathways to impact" for grant applications.

### Software Carpentry

*Feb 2013*

Programming philosophy, code structure and version control

### Genses2Geoscience: Writing for journals

*Aug 2012*

**Macquarie University, Ryde, Australia**

Drafting and writing journal articles and research proposals

### Genses2Geoscience: Database Construction using sql

*Sep 2011*

**Macquarie University, Ryde, Australia**

### Genses2Geoscience: Teaching in small groups

*Aug 2011*

**Macquarie University, Ryde, Australia**

Effective questioning, encouraging equal participation, and managing student behaviour.

### Planning and writing journal articles

*Nov 2009*

## Skills

### Vegetation modelling

I have been lead developer on LPX - a high-complexity coupled Dynamic Vegetation-Fire Model - since 2009. LPX has both Fortran and C++ components for fast (relative to it's # complexity) computational times. I have recently also added a shell and R interface to facilitate parrallization and to allow outputs to be easily analysed and plotted.

See [dougask3.github.io/LPX](https://dougask3.github.io/LPX) for more information.

### Statistical Programming

Most of my research involves statistical anaylsis of large datasets and model outputs. Collaboration on many of my projects means I am fluent in most widely used statistical programming languages. Most of my work is in either R, python or matlab, but I have also performed graphical and statitital analysis using Fotran and C amongst others.

See [dougask3.github.io/my\\_best\\_plots](https://dougask3.github.io/my_best_plots) for examples of R and matlab plots from my PhD.

See [dougask3.github.io/lpxbenchmarking](https://dougask3.github.io/lpxbenchmarking) for an example of statistical benchmarking of extensive model outputs again global raster and site-based datasets.

Douglas Kelley - CV

page 6 / 8

## Extended CV

## Skills Continued

### Web Design

In my spare time, I have developed dynamic websites using open source content management system (such as concrete5 and wordpress). Also, my personal site is on a static host, but is maintained using a python based dynamic-site emulator. Developing and maintaining these sites have allowed me to become familiar with many web design software packages systems and fluent in HTML/CSS, PHP and Markdown. I have also linked Markdown with R and python when sharing and presenting results from model development and anlaysis.

See [eppingdac.com.au](https://eppingdac.com.au), an example of a website I have developed using Concrete5 content managment system

See [dougask3.github.io](https://dougask3.github.io), an example of a website produced using a simple dynamic-site emulator.

### Publishing

As well has publishing papers, I have also written manuals, reports and newsletters using a variety of languages and software products, including (aside from standard office/open office):

- Latex - this includes my thesis, available at [goo.gl/9YjwKw](https://goo.gl/9YjwKw) )
- Scribus - my running club newsletter, available at [eppingdac.com.au/news-and-views/newsletter](https://eppingdac.com.au/news-and-views/newsletter)
- Photoshop/Illustrator and GIMP (the open source equivalent). See [flickr.com/doug\\_from\\_the\\_uk](https://flickr.com/doug_from_the_uk) for examples of graphical art and photo "touch ups"/manipulation.

## Software Tools

I have developed and maitained several software packages related to my rearsrch projects or to help organise work flow with collaborators. Some of the most used are:

### Vegetation Benchmark Metrics

An R-package containing the metrics and basic statistical models relating to my work on Vegetation model benchmarking.

See [dougask3.github.io/vegetation-model-benchmarking](https://dougask3.github.io/vegetation-model-benchmarking) for more information.

### Git-based R project Tracking

Tools for tracking r-projects version controlled by Git.

See [dougask3.github.io/git-based-r-project-extras](https://dougask3.github.io/git-based-r-project-extras) for more information.

### LPX

Running, storing, analysing and plotting the LPX-Dynamic Global Vegetation Model.

See [dougask3.github.io/lpx-dynamic-global-vegetation-model](https://dougask3.github.io/lpx-dynamic-global-vegetation-model) for more information.

For a more comprehensive list, see [dougask3.github.io/pages/tools](https://dougask3.github.io/pages/tools)

**Committee Member responsible for web-design communications, and social runners***Feb 2011-May 2015***Epping and District Athletics Clubs North Epping, Hornsby, NSW, Australia**

Website development ( [www.eppingdac.com.au](http://www.eppingdac.com.au) ); designing, producing and distributing newsletter and e-publicity for local community running and athletics club

**Group discussion chair***2011 - 2013***Biosphere & Climate Dynamics, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia**

Organised and chaired group meetings and paper discussions

**Outreach volunteer***2010 - 2011***Genses2Geoscience, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia**

Demonstrated department research at school tours of the University

**Student Union involvement***2002-2009***University and Warwick and Bristol University**

Sabbatical year sitting on board of directors of Warwick Students Union responsible for the Student Advice and Welfare department; 3 years as charity trustee and 6 years on student council responsible for Science Faculty representation; committee posts on various student run sports clubs and societies including People and Planet, Student TV station , Student Support Groups, and running clubs
